

Anatoli Tchernavskikh Ph.D. (Geology), P. Geol.

Manager, International Geology

Post Secondary Education

Moscow State University, Russia - M.Sc. and Ph.D.

Work History

1998 - Present McDaniel & Associates Consultants Ltd.

1997 - 1998 Serpa Petroleum Consulting, Canada

1992 - 1997 NoyabrskNefteGas (GASPROM-NEFT), Russia

Professional Organizations & Associations

The Association of Professional Engineers and Geoscientists of Alberta (APEGA) - Member

Canadian Society of Petroleum Geologists (CSPG) - Member

European Association of Geoscientists & Engineers (EAGE) - Member

Languages

English and Russian

Professional Experience & Responsibilities

Mr. Tchernavskikh has in excess of 25 years experience as a petroleum geologist with a focus on subsurface mapping, petrophysical interpretations and reservoir characterization. He has been principally involved with evaluations of oil and gas properties outside of Canada for reserves certifications, annual reporting and acquisitions and divestitures during the past 19 years. He has analyzed and reconciled geophysical data, geological and engineering data and has prepared geological models for reserves and resources evaluations.

Mr. Tchernavskikh also has considerable experience with the assessment of exploration prospects and portfolios using deterministic and probabilistic methods and risk analysis. He has experience with a variety of geosciences software programs.

Mr. Tchernavskikh has accumulated experience in most major oil and gas basins throughout the world, including sedimentary basins in Kazakhstan and Russia, Eastern Europe, the Middle East, North and Central Africa, South and North America and South-Eastern Asia. He has worked with both clastic and carbonate reservoirs onshore and offshore.
