Society of Petroleum Engineers (SPE) - Member

Professional Experience & Responsibilities

Mr. Kowalski has in excess of 20 years of industry experience in the evaluation of oil and gas reserves and preparation of economic evaluations for purposes of annual reporting, reserves audits, and acquisition and divestitures. During this time, he has evaluated a broad spectrum of assets throughout the Western Canadian Sedimentary Basin including shallow gas, coalbed methane, deep gas (vertical and horizontal exploitation) and conventional light and heavy oil developments in Saskatchewan/Alberta (primary/secondary/tertiary recovery projects).

Mr. Kowalski has an extensive client list which includes investment companies, banks and both private and public oil and gas companies. He is also responsible for preparing McDaniel's price forecasts and for the supervision of a number of technical and professional staff dealing primarily with the evaluation of conventional oil and gas properties throughout Western Canada.
