2005 - Present McDaniel & Associates Consultants Ltd.

2004 - 2005 Terracon Geotechnique

Professional Organizations & Associations

The Association of Professional Engineers and Geoscientists of Alberta (APEGA) - Member

Canadian Society of Petroleum Geologists (CSPG) - Member

Professional Experience & Responsibilities

Mr. Jenkinson is responsible for geological evaluation work, including preparation of petroleum and natural gas reserve evaluations which include geological/petrophysical interpretation and mapping. He has prepared geological assessments for a number of oil and gas fields in Canada, as well as coalbed methane gas projects within Canada and Mexico. These geological reports have been used for a variety of purposes, including public company annual reports and various financial regulatory reporting. Mr. Jenkinson is experienced in acquisitions and dispositions of oil and gas properties and/or companies.

Mr. Jenkinson is involved in conventional and resource plays, which include tight gas/oil and shale reservoirs throughout the Western Canadian Sedimentary Basin (WCSB). He has recently completed evaluations of the Montney, Duvernay, Spirit River and Cardium formations for development with multi-stage horizontal wells.
