Professional Experience & Responsibilities

Mr. Taylor is a highly motivated, experienced petroleum engineer with excellent technical and commercial skills. He has significant international oil and gas experience across all aspects of the business - exploration, appraisal, new developments, mature fields, operatorship, acquisitions, and divestments. He has worked on fields in Africa, Asia, the Middle East, and the North Sea, including both oil and gas, clastics and carbonates, and primary through to enhanced oil recovery.

Mr. Taylor has very strong reservoir engineering technical skills, which include well test analysis, analytical methods and reservoir simulation. His commercial skills include economic modeling where he has worked with a range of different styles of contracts (e.g. Tax-royalty, PSC, Buy-backs). He has been responsible for evaluating reserves throughout his career and was the reserves coordinator within PetroKazakhstan, responsible for the introduction of the Canadian NI51-101 reserves reporting regulations within the company.

Mr. Taylor is responsible for managing McDaniel International's new office in the UK, just outside London in Guildford. This will bring greater support to the many clients based in Europe and will help further expand the international side of McDaniel & Associates business.
