Professional Experience & Responsibilities

Mr. Ott has over 15 years of experience evaluating oil and gas properties. During this time, he has evaluated a broad spectrum of assets, which include domestic properties, North American frontier properties of the East Coast and Arctic Islands, and international properties.

Throughout his professional career, Mr. Ott has provided technical consultations to clients during their acquisitions and divestitures. He has provided technical opinions on development and exploration potential and has conducted studies to quantify bypassed pay potential, as well as exploitation and exploration opportunities.

Mr. Ott has been involved in several resource type plays which include CBM, oil sands and tight gas sands throughout the Western Canadian Sedimentary Basin.
