Professional Experience & Responsibilities

Mr. Carmichael is an Associate with McDaniel & Associates Consultants Ltd. and has in excess of 10 years of experience. He has prepared domestic oil and gas reserves evaluations and audits for corporate annual reports, debt financing, due diligence reviews and acquisition/disposition purposes for properties throughout Western Canada. He has an extensive list of clients, which include public and private oil and gas companies, both large and small.

Mr. Carmichael is responsible for many of the shale gas and tight gas evaluations (specifically the Montney Formation) and resource studies in the Western Canadian Sedimentary Basin. Mr. Carmichael also specializes in shallow gas and coalbed methane evaluations for properties in Alberta. He has significant experience with high-density infill programs within coalbed methane and conventional shallow gas developments.
